

ARAVIND KUMAR S

UI/UX Designer | AI-Driven UI Engineer

Bangalore, India · aravindkumarak1302@gmail.com · +91 8825565914 · [LinkedIn Profile](#) · [Portfolio](#)

PROFILE

UI/UX Designer with 4+ years of experience designing interfaces for industrial vision and measurement systems. Combines hands-on field experience with usability-focused product design and AI-assisted design-to-code workflows. Experienced in translating complex machine configuration and inspection workflows into touch-friendly interfaces and interactive prototypes, with consideration for implementation in Elixir + Phoenix LiveView.

CORE SKILLS

UX / UI Design

Figma · User Research · Coggle · Wireframing · High-Fidelity Mockups · Prototyping · UX Flows · Design Systems · Usability Validation

AI-Assisted Design & Prototyping

Claude Design · Google Stitch · Google AI Studio · Figma Make · Gemini · NotebookLM · Prompt Engineering

UI Engineering

HTML · Phoenix LiveView (HEEx) · Tailwind · Ant Design · Component Libraries (Petal, Salad UI) · Design Tokens

Automation & Testing

UiPath Studio · Functional Testing · Regression Testing

EXPERIENCE

ZENTRON LABS PVT LTD — Bangalore

UI/UX Designer · Apr 2023 – Present

Key UI/UX Projects

- G-Tron Configurator — designed the end-to-end self-service configuration experience, translating a code-dependent setup workflow into a guided, touch-friendly UI, from UX flow mapping and information architecture through high-fidelity interactive prototyping. Reviewed mock UI with the internal application team to evaluate ease of use, configuration logic, and technical practicality, incorporating feedback into design iterations.
- New Inspection UI — redesigned the inspection experience, including Force Start and Auto Measure controls, refined through multi-phase stakeholder reviews.
- Multipart Inspection UI — built scalable interfaces for inspecting multiple components in a single cycle.
- Auto Feature Detection UI — simplified automatic feature detection and precise inspection tuning.

AI-Driven Design Workflow

- Driving UI/UX for the 4.0 product line, contributing to the design and stack transition to Elixir + Phoenix LiveView.
- Creating operator-friendly interfaces that balance usability, accuracy, and machine constraints.
- Defined and executed an AI-assisted design-to-code workflow, converting UI designs into high-fidelity HTML/HEEx interfaces using Stitch, Figma, AI Studio and OpenCode.
- Built an interactive AI-powered UX simulator using NotebookLM, Gemini App and AI studio enabling stakeholders to experience proposed screens before development.
- Evaluated Phoenix-native component libraries and established reusable design tokens and components to standardize the design system.

Automation Test Engineer

Nov 2022 – Apr 2023

- Automated 300+ test cases using UiPath Studio, improving test execution efficiency by 75%.
- Built automated reporting (logs, pass/fail metrics, video capture) and JSON-based selective test execution; integrated with vision machines and Zoho ticketing.

Field Application Engineer

Sep 2021 – Oct 2022

- Delivered on-site/remote support, customer demos, installations, and QC validation for vision inspection systems.
- Acted as key link between customers, R&D, and software teams, gaining first-hand exposure to operator workflows, machine constraints, and real-world inspection-system usage that later shaped UI/UX decisions.

EDUCATION

B.E. — Electrical & Electronics Engineering

Sri Shakthi Institute of Engineering and Technology, Coimbatore · 2017 – 2021
